Experience

UX Designer, Microsoft (Contract)

July 2019–Present

- Lead cross-platform sharing and link settings experiences used in over 40 end-points across Microsoft Office 365 suite and opened nearly 400M times per month
- Collaborate with a team of project managers, data scientists, user researchers, and engineers on improving OneDrive's sharing experience and launching new features
- Organize and facilitate design sprints and wall reviews to solve user experience problems across sharing features
- Partner with design teams from Microsoft Office 365 and provide expertise on the sharing experience integration
- Introduced flexible Sharing Menu adopted in Word, Excel, OneNote, and Stream, allowing to solve various user pain points in their products
- Introduced Shared With section resulting increase in accessing Manage Access experience by 34%
- Led Share Dialog redesign, resulting increase in sharing completion by 34% and the use of the Role Selector by 3.9%
- Led Copy Link Dialog redesign, resulting increase in successful change of link settings by 27%
- Built OneDrive's Sharing Assets library used to create design mocks for sharing experiences across Microsoft Office 365

UX Design Intern, City of Seattle

September 2018–July 2019

- Collaborated with a team of designers, project managers, and engineers, organized and facilitated design sprints and wall reviews to improve user experience on the seattle.gov website
- Introduced a pattern of alert messages adopted across all departmental websites in the City of Seattle
- Led an initial Design System project for the seattle.gov website; conducted primary user research; built its assets library in UXPin from scratch

Designer, University of Washington

August 2016–June 2018

- Created posters and other design deliverables for University of Washington Graduate and Professional Student Senate
- Rebranded Senate's logo and designed its promotional materials
- Conducted user research, rebuilt information architecture, prototyped, redesigned, and user-tested Senate's website, resulting increase in unique visits by 53%

Aircraft Mechanic, US Navy

June 2010–October 2014

- Designed and produced aircraft marks and symbols in accordance with industrial design standards

Side projects

Ongoing

Wires: Crypto address shortener (React web app); Vets who design: Design community (React web app); Wikiwod: CrossFit workouts library (Alexa skill)

Education

University of Washington, Bachelor's of Design, Informatics (Minor)

June 2019, Seattle, WA

LWTech, AAS Multimedia Design

June 2016, Kirkland, WA

Achievements

The Crabby Beach Foundation Endowed Scholarship in Art

October 2016, University of Washington

Future Tech Stars Scholarship

December 2015, LWTech

Foundation Scholarship

Spring 2015, LWTech

Skills

Technical

UX/UI Design Typography
