Experienced UX Designer with proficiency in B2B product design, design systems, and a proven track record in web and mobile application design, seeking a challenging role to create exceptional user experiences in collaboration with cross-functional teams.

Experience

UX Designer, Amazon
Contract: October 2022–Present

- Led the eero Design System documentation effort, working independently as a full-time member of the team

- Created and enhanced user experience flows for the eero's B2B product (eero Insight) in collaboration with a cross-functional group of designers, project managers, and engineers.

- Took the initiative to create an icon set and establish Iconography guidelines specifically for eero Insight.

UX Designer, Microsoft
Contract: July 2019–September 2022

- Led the sharing experience initiative across the Microsoft 365 mobile and web product suite, functioning independently as a full member of the OneDrive design team.

- Collaborated with a cross-functional team of designers, project managers, and engineers to enhance OneDrive's sharing features, introducing the Sharing Menu, Share Dialog, and Copy Link Dialog, driving a 34% increase in user engagement and sharing completion.

- Created a Figma design assets kit for Microsoft 365 sharing experiences on web and mobile.

UX Design Intern, City of Seattle
September 2018–July 2019

- Collaborated with a multidisciplinary team to enhance the user experience of the seattle.gov website.

- Introduced a pattern of alert messages adopted citywide, ensuring consistency and resulting in valuable improvements.

- Led the initial Design System project for seattle.gov, conducting user research and building the assets library from scratch.

Designer, University of Washington
August 2016–June 2018

- Played a key role in designing and creating various materials, rebranding the Senate's logo, and designing promotional materials.

- Conducted comprehensive user research, rebuilt the website's information architecture, and conducted user testing, resulting in a 53% increase in unique website visits.

Aircraft Mechanic, US Navy
June 2010–October 2014

- Performed inspections, maintenance, and diagnosed complex mechanical issues. With exceptional attention to detail, I excelled in repairing aircraft systems and maintaining high-quality aircraft skins.

- Actively participated in industry training and provided comprehensive guidance to new sailors, ensuring their success, fleet readiness and overall effectiveness.
